Subject: NT Sizer Update

Note: You may have already received the following message. If so,
ignore it.
****

Attached find an updated version of the NT Sizer. The two files,
NTSizer_280.exe and NT Sizer User Guide.exe, are WinZip compressed
files.

NTSizer_280.exe contains the following files:
- Excel add-in file NTSizer_280.xla which should be loaded to use the
sizing tool
- *.xlt files which are workbook templates used dynamically by the
sizer
- Sample System Sizing.xls which is a sample output from a sizing

NT Sizer User Guide.exe contains the user guide in pdf (Adobe Acrobat)
format

This version requires Office 97 to run. Also, it has been modified to
run on the Japanese version of Excel as well.

Updates since the   .   class are:
- Support for SQL Server 7 and Oracle 8 OLTP applications
- Comparators for both TPC-C and TPC-D, updated
- Inclusion of NIC Sizing

Updates since the   class are:
- Providing a more detailed manner of determining mass storage
capacity requirements
- Detailed mass storage capacity calculations for SQL Server 6.5, 7.0,
snf Oracle 8 databases

If you have any problems installing and running the sizer, please let
me know.

Also, note that our Web page has several additions and enhancements.

Regards

Mike Quernemoen
